- You must have and use your own memory card in the cameras.

## Canon Sample Print

Canon is offering a print of your image printed on a Canon Printer. Bring a file ready to print on a USB drive to the Canon vendor table. A representative from the **Canon Pixma Printer Group** is available to answer your questions.

### **Print File instructions:**

- Save file as TIFF, PSD, or JPEG
- Color space should be Adobe RGB or SRGB

Save the print file in a folder labeled CANON on a USB Flash Drive with your name on the file and USB drive. They will size the image. If you are undecided which image to print, create multiple folders with one file in each and name the folders sequentially, i.e., CANON1, CANON2, CANON3, etc., and put the folder name on the form at the Canon Print table.
