Join Lee Varis on an exploration of the unseen world of infrared photography. Lee guides you through the numerous options for infrared camera conversions, both color & B&W. He explores special considerations for subject, lighting, and post processing techniques. Lee shows how you can get started in the creative possibilities of Infrared capture, and go beyond the normal, everyday scenes of the visible spectrum to experience the dreamtime of the invisible infrared spectrum.

Photo Walks are one hour long and limited in size. This is your chance to spend some quality time shooting with a NECCC Speaker and asking them questions.

Note: Photo Walks are subject to availability, so register early!  
Max one per attendee.
