Info

< <https://neccphotoconference.org/mcginnis-chris/> >

When	Fri 8:30 am – 11:30 am
Where < https://neccphotoconference.org/maps/ >	Listed in your workshop registration info
Bring	Camera, SD Card, Tripod. Olympus will have cameras and lenses available to try focus stacking in-camera.
Skill	All levels. Must be able to stand during workshop.
Cost	\$75, after Jun 24 \$95

Anyone who has worked with a macro lens recognizes that it can be a real challenge to achieve a sharp subject from front to back and still maintain a nice, soft, defocused background. In fact, it's often an impossible task.

Enter focus bracketing and focus stacking. The concept is simple: Take a series of photos with slightly varied focus and composite the in-focus areas. Olympus has automated the process so that you can achieve the maximum depth of field and get the final stacked image – all in your Olympus camera! This same concept can also be used to create landscape images with incredible depth of field.

Join OM Ambassador Chris McGinnis for this hands-on workshop on how to use the focus bracketing and stacking features built into Olympus OM-D and OM SYSTEM cameras. You will learn the basics of focus bracketing and stacking, the camera controls that will guarantee better success, and some alternative post-processing options available for stacking bracketed series.
