Master photographer Frans Lanting has a gift for connecting people with the lives of wild animals and showing us the world through their eyes. His powerful personal perspective illuminates the big stories behind his images, which are drawn from three decades of work in wild places from the Amazon to Antarctica.

His presentation provides insights into his unique approach to visualizing ideas about the natural world and includes the story of his LIFE symphony, a multimedia orchestral performance featuring Lanting's imagery and the music of Philip Glass—a work that tells the story of life on earth from the Big Bang to the present and has captivated audiences around the world.
