Break Free

About OM Digital Solutions (Olympus)

They may have their cameras and lenses available for attendees to borrow by the hour for use during the weekend.

Break Free From Big and Bulky

Carrying lighter gear gives you more energy. More shooting flexibility. More ways to express yourself. You're free to shoot longer so you can nail the right shot. Out compact systems let you react more quickly and blend into the scene – unlike larger cameras and lenses that can draw unwanted attention and make subjects feel uncomfortable. Because when your camera gear is perfectly designed for you, you're free to be your very best.

Shoot With Less Gear and More Freedom

Our image stabilization uses sophisticated technology to do a simple thing: replace your stabilizing gear. You're free to shoot handheld. Take spectacular telephoto and macro shots. Walk and explore and never worry about blurry stills or video. Even capture crisp colorful photos in low light. Our industry-leading 5-Axis Sync IS combines camera and lens stabilization to give you up to 7.5 shutter speed steps of compensation, the world's most effective stabilization performance*. Only Olympus offers you so much mobility and freedom.

*As of January 2019 OM-D E-M1X camera with M.Zuiko Digital ED 12-100mm F4.0 IS PRO lens.

Engineered to Amaze

M.Zuiko lenses bring out the best in your photography. They're built to rigorous quality standards and feature precision-cut glass with bright, fast apertures. Our M.Zuiko PRO lens lineup includes our world-class optics and adds metal construction and worry-free weather sealing. And like our cameras, M.Zuiko lenses are compact yet deliver imaging power equal to that of much larger lenses. All to help you break free and photograph more.
