How to save an Adobe Acrobat (PDF) form

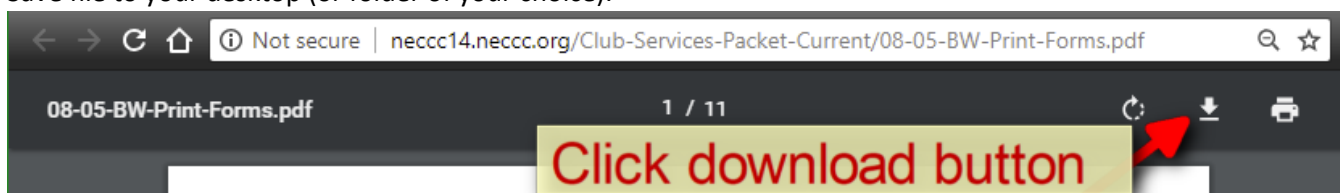

Saving any PDF document is dependent on the software you are using to enter data into the form. Here are a couple examples. **Recommended choice:** use the free Adobe Acrobat Reader which is available from <https://get.adobe.com/reader> (hint: unselect all optional offers before download). Do not use Photoshop since Photoshop discards the form information when opening any PDF document.

Adobe Acrobat Reader (free at <https://get.adobe.com/reader>)

1. File-> Open this URL <http://neccc14.neccc.org/Club-Services-Packet-Current/08-05-BW-Print-Forms.pdf>
2. File -> Save As ... (choose your favorite location, e.g. Desktop)
3. Open (if needed), File -> Open... wherever you saved the file
4. Enter data on page 2 and page 3 only, save, print, ...

Google Chrome

1. Browse to <http://neccc14.neccc.org/Club-Services-Packet-Current/08-05-BW-Print-Forms.pdf>
2. Save file to your desktop (or folder of your choice):

3. Opening the file in Chrome can be tricky since the default app for opening any PDF document is probably not Chrome. In Chrome enter the path to the document, e.g. on Windows <file:///C:/Users/<your user name>/Desktop/08-05-BW-Print-Forms.pdf>
4. Enter data on page 2 and page 3 only, save, print, ...
5. To save from Chrome, Print and choose the destination of "Save as PDF" and Chrome will ask you where to save the PDF document.

Do not change anything on this page!
