Neon at Night a personal project going on for over a year. Started with photographing brightly lit diners at night, then it expanded to other buildings and architecture. Photos are processed to achieve a fine art look. Program is a powerpoint, followed by a live PS and LR Demo followed by a slideshow set to music.

See samples here <https://www.instagram.com/NotYourAvgJoe.neon/>

Ideas for Creative photography is a program designed to prompt photographers to look outside the box when shooting. Shows examples and ideas to make your photos more creative. This is a powerpoint slideshow.

Lightroom Live Demo is just that. I show how to process in Lightroom, take questions, show tips. All Live. Audience can submit photos ahead of time to be edited. There may be some use of PS as well.

Shooting and Processing Cars - Similar to the Neon Program this program focuses on shooting cars at car shows and how to edit them so they "stand out from the crowd" Powerpoint, Live Demo and Slideshow

Covid City Captures - Discussion of NYC and area during the Covid Lockdown. Showing photos of both the empty city as well as some conventional photography taken during that time.

Taking Better Photographs based on a ebook that I wrote

Powerpoint presentation
